Cambria® Care and Maintenance

Cambria® comes with a 10-year manufacturer warranty. It is important that you visit Cambria's® website and register your countertops. Please go to www.cambriausa.com to register you countertops and for complete care and maintenance instructions. It is important that you follow the guidelines for the care and maintenance of your countertops to preserve your warranty.

Cleaning

- Cambria® is an engineered stone, which is more scratch and heat resistant than many other surfaces, but if your Cambria® is scratched or damaged it must be professionally repaired. This can be avoided by always using a cutting board. Using knives directly on the surface will dull your knife, and shorten its lifespan.
- To keep your Cambria® looking shiny, keep it dusted regularly to remove loose soil and dust that can scratch the surface.
- When cleaning your Cambria® use a clean cloth and soapy water. You can also use window cleaner on the tops to help maintain their shine. Most countertop cleaners will work fine on Cambria®. CVCT sells and recommends Countertop Magic®.
- **Never** use harsh abrasive or acidic cleaners on engineered stone such as vinegar, bleach, ammonia or other general-purpose cleaners. These could discolor the surface or etch the surface.
- Engineered stone is non-porous, and does not have to be sealed, but spills should taken care of immediately, and not left standing on the top.

Heat

Cambria® is heat resistant, however we recommend that you put hot items on a trivet or hot pad, and not directly on the surface. Extreme heat can damage the surface. Please see the Heat Warning for further information.
